

ANOSAN® SHK

Disinfection of tools and installation material
naturally pure

We are your solution!

ANOSAN® SHK usage

ANOSAN® SHK is used for various disinfecting tasks

Disinfecting solution for rapid disinfection of fittings, pipe sections, working equipment and surfaces.

ANOSAN® SHK acts germicidal, is not toxic and can be used without specific precautions. Skin, eye and mucosa friendly.

Range of efficiency:

bactericide, fungicide

The labeling of ANOSAN® SHK in accordance with the Regulation (EC) No. 1272/2008 (CLP) is not applicable. The product is not a subject of labeling due to the calculation method of the "General Classification Guideline for mixtures of the EC" as last amended.

ANOSAN® products are manufactured out of our specially developed ECALIT® procedure consisting of highly purified and electrochemical activated saline solutions. They possess special physicochemical and catalytic qualities.

Without any organic chemicals ANOSAN® products are skin friendly, not toxic and only hold an extremely low allergic potential. All products leave just pure mineral degradation products, which are not harmful to health and environmentally sustainable.

Product overview

Highly effective, neutral germ reduction on pure mineral basis

Container sizes:

ON REQUEST
